Aim
The aim of the symposium is to bring together researchers, scientists, industry experts and PhD students to provide a general forum for researchers, engineers and PhD students involved in the general area of mechanisms and machines, and their applications, to disseminate their latest research results and exchange views on the future research directions of these fields.

Topics
We are looking for original, high-quality contributions on topics related to mechanisms within aspects of theory, design, practice and applications in engineering, including but not limited to:

- Theoretical kinematics
- Computational kinematics
- Mechanism design
- Experimental mechanics
- Mechanics of robots
- Dynamics of machinery
- Dynamics of multi-body systems
- Control issues of mechanical systems
- Mechanisms for biomechanics
- Novel designs
- Mechanical transmissions
- Linkages and manipulators
- Micro-mechanisms
- Teaching methods
- History of mechanism science
- Industrial and non-industrial applications

Submission, presentation and publication
The official language of the symposium is English. Each paper will be reviewed, and the papers selected by the Scientific Committee will be published in a book edited by Springer, Mechanisms and Machine Science series. Only papers with at least one author as registered participant will be included into the conference volume. All submitted papers must be strictly prepared following the publication guidelines. For detailed up-to-date information, please visit the SYROM'2017 conference website.
